

## We have puppies - 2 breeds!!!

After a lot of waiting and guessing when the Wild dogs puppies at Lagoon would give us their first appearance – it has finally happened. The following pictures were taken on Sunday 19<sup>th</sup> July, 2009

We are the proud parents to 9 new puppies

Their den is about 20 minutes away from Lagoon camp and the proud mother only showed them to us for the first time 1 week ago, and since then only in the evenings when the rest of the pack are around to “keep guard” of her babies.

They have been seen eating regurgitated food that the rest of the pack bring back at siesta time after their twice a day hunt.

Hyena pups are also in the area and as soon as we have some more information and pictures we will be sure to send that information and images to you...
